

Devizes

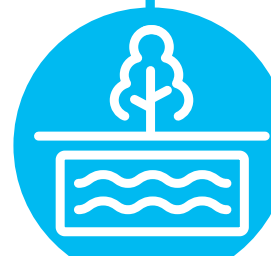

Volume of wastewater (including rainwater) treated and returned safely to rivers:

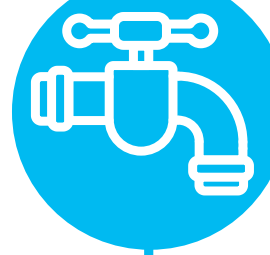

In **dry weather** = **2.2 million litres** per day
(or six leisure centre swimming pools!)

In **wet weather** = **7.5 million litres** per day
(or 21 leisure centre swimming pools)

Drinking water comes from a local borehole, held in below ground reservoirs and treated before fresh water flows into town supply.

Volume of water used by residents:
3 million litres every day
(or eight leisure centre swimming pools)
